The figure displays a family of curves on a grid. The grid consists of 8 vertical lines and 4 horizontal lines. The curves are ordered by their initial height on the left side of the plot. The topmost curve starts at the highest point and decays towards the horizontal asymptote. The bottommost curve starts at the lowest point and also decays towards the same horizontal asymptote. The curves in between follow a similar pattern, with their initial heights decreasing as they move down the stack. The curves are all smooth and appear to be part of a continuous family.
